

Remote Controllers Design

#storywithWEIPU

March 2022

IKSOR is specialized in developing customized electronic modules and providing both hardware and software development as well as prototyping and final testing.

They choose WEIPU push-pull SF series for remote controller projects for industrial and agricultural usage.

SF has been a popular choice for our clients. With IP67 protection, a push-pull fast connection function, SF can be applied for a variety of industries and keep stable connecting even in harsh environments.
