

Rail Adapter DESIGN

#storywithWEIPU

STARDEX chooses WEIPU SF series for its Rail Pump Adapter projects.

STARDEX has been focused on modern test equipment for Common Rail and UIS/PLD diesel systems. For this kind of application, ensuring the correct and secure connection is the priority. Thus, it is important to choose a solid, high-quality connector to keep a stable connection. Meanwhile, a connector with a push-pull design can also make it easier to use when switching the mode between plugging and unplugging.

Designed by Stardex Diesel OU

WEIPU SF SERIES FEATURE

- **Brass Made**
- **Push-pull Design**
- **Fast Connection**
- **IP67 Protection**
- **Solder/Screw/Crimp Termination**
