WildDetect

# Outdoor BirdAlert Project

**WildDetect's choice:**  
*high quality connectors*

SA series:

IP67 Protection  
Push-Pull fast connection  
Multi-color options

SP series:

IP68 protection  
Threaded connection  
Customized All-black

**"We are often placed in cold and rough weather, where your connectors fit perfectly."**

*-Allan Kirkegaard,  
Technical Manager at WildDetect*

With over 10-year experience in bird control services, WildDetect provides unique solutions that can decode specific bird sounds and enable different scathing techniques.

WildDetect applied WEiPU connectors on BirdAlert 1 and the following generation 2 to communicate to the external scaring devices and for power and sound input. As the devices are often placed in cold and rough weather, where WEiPU high waterproof metal series-SA and plastic series-SP realize a stable connection and ensure its good operation.

*Designed by WildDetect with WEiPU SA series*
