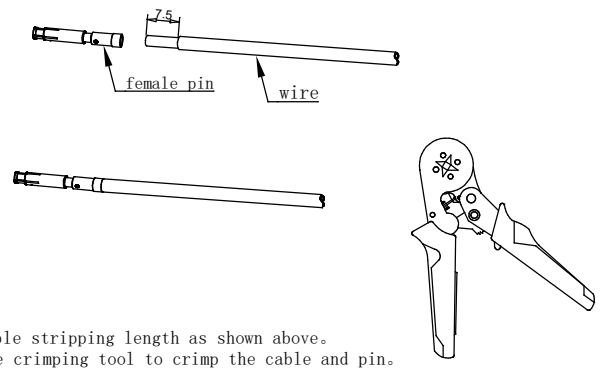
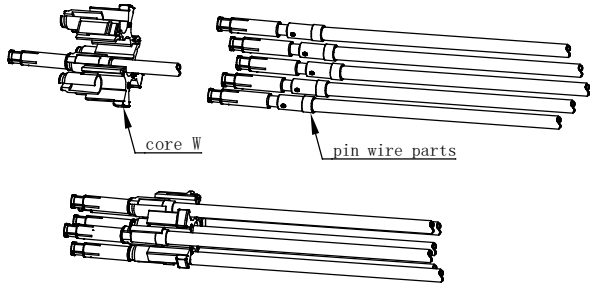
Figure 1



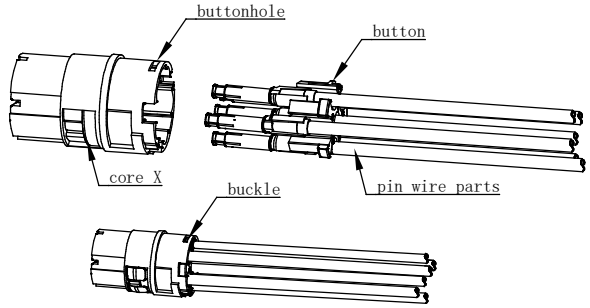
1. Cable stripping length as shown above。
2. Use crimping tool to crimp the cable and pin。

Figure 2



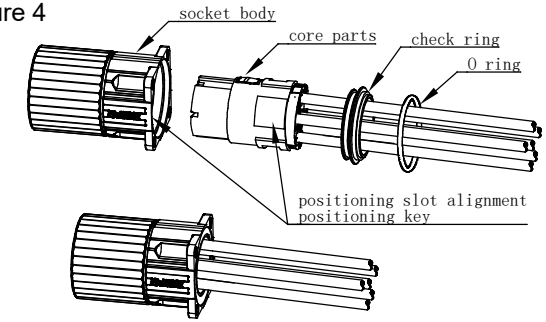
1. Insert the crimped male pins into the core W, first install the middle hole and tighten the core W, then buckle the outer pins into the core holes。

Figure 2



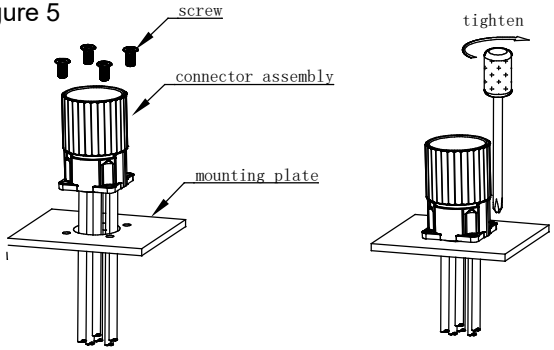
1. Align the core Z and install it into the core X. Note that the button and buttonhole must be aligned. After installation, the button should be able to buckle the core without separation。

Figure 4



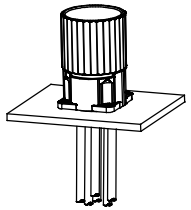
1. Align the positioning key of the core parts component with the positioning slot in the inner hole of the socket body, then press it in. After that, use a check ring to press into the socket body for fixing the core parts. Finally, install the O ring into the O slot as shown above。

Figure 5



1. Fix the assembled connector assembly to the mounting plate, then tighten the screw。
2. The specifications of the mounting plate are detailed in the catalogue。

Figure 6



1. The final installation will be as shown in the figure above。
